

# AWAKENING AUTHENTIC LEADERSHIP AND PERSONHOOD

A workshop for managers, trainers, supervisors and others who do leadership work

*“Leadership begins when we begin in this world. We have the capacities to bring this forth in taking and knowing our place in life ”*

**With Dr. Frank Cardelle**

There is much confusion today about leadership, what it is and how do we use it more effectively. Most of us have learned to believe that it is about obedience and following someone else’s goals, dreams and ambitions.

Real leadership involves a living, evolving process that begins at birth and ends at death. The in-between is spent cultivating, shaping and refining this inborn gift that we all possess to know our path and destiny in life.

In this workshop we will learn the following:

- Leadership comes from within
- It is about being authentic, possessing integrity, dignity and respect for life.
- No two leaders are the same
- The heart connection
- Balancing both the masculine and feminine
- Knowing our rightful place in the world
- Bringing out the best in ourselves and others
- Leadership process connection to body, mind, spirit, nature and cosmos
- Practice for knowing and using our real leadership capacity.

Drawing from over 25 years of study, training, traveling and cross-cultural lessons: plus an extensive background and a synthesis of Humanistic, Transpersonal Psychology, both Eastern and Western modalities, and Native American tradition. The participants will be invited to co-create an atmosphere of dynamic learning, dialogue and shared life stories. Surprise, fun and laughter can also be possible. WELCOME!
